Skills

Android & Mobile: Kotlin, Java, Jetpack Compose, Android SDK, Clean Architecture, MVVM, BLE, Maps SDK, Flutter, React Native

Backend & DevOps: Node.js, NestJS, REST APIs, GraphQL, PostgreSQL, Github Actions (CI/CD), Gradle, Fastlane, AWS, Firebase

Core Competencies: Scalable System Design, Performance Optimization, TDD, Agile/Scrum, Cross-functional Leadership

Work Experience

Creative Synergies Group, Bengaluru

May 2025 - Present

Software Engineer (Full Stack)

- Architected a scalable **Field Service Management (Fleet)** solution, optimizing workflows for 100+ technicians using **Clean Architecture** and **MVVM**
- Designed robust Android modules in **Kotlin** utilizing **Jetpack Compose** and **Room**, ensuring 99.9% data integrity during offline operations
- Integrated complex location services (Geofencing, Live Tracking) to validate field operations, directly impacting operational efficiency
- Automated release pipelines using **GitHub Actions** and **Fastlane**, reducing build-to-delivery time by 50% for Android and iOS
- Led cross-functional collaboration with product and design teams to deliver a 95% crash-free experience across diverse device fragmentation
- **Stack:** Android (Kotlin), Flutter, NestJS, PostgreSQL, Github Actions, Google Maps SDK

HealthFlex, Bangalore

Mar 2024 - May 2025

Founding Engineer (Mobile Lead)

- Led the end-to-end engineering of two high-performance mobile apps serving 1,000+ users, achieving a 95% crash-free rate in production
- Engineered a critical **Bluetooth Low Energy (BLE)** module handling 20Hz data streams per device; optimized latency by 40% using RxJS/Reactive patterns
- Established rigorous **CI/CD** workflows and release management protocols, ensuring rapid, reliable feature delivery to production
- Optimized application performance and memory usage, enabling smooth operation on low-end Android devices in constrained environments
- Collaborated closely with stakeholders to translate business requirements into extensible technical solutions
- **Stack:** Mobile (React Native/Android), TypeScript, Kotlin, BLE, CI/CD, Firebase

EMotorad, Bangalore

Sep 2023 - Nov 2023

Android/Mobile Engineer Intern

- Developed an E-Bike (Vehicle) Rider app featuring real-time navigation and telemetry, integral to the fleet ecosystem
- Integrated **Mapbox** and Google Maps APIs for custom routing, geocoding, and offline caching, reducing map data costs by 70%
- Implemented robust Bluetooth communication layers for vehicle connectivity, improving connection stability by 90% via background services
- Applied **SOLID principles** and modular architecture to support rapid scaling of vehicle features and telemetry data
- **Stack:** Flutter, Android Native, Mapbox, BLE, Dio, Firebase

PySphere LLP

Nov 2021 - Sep 2023

Software Engineer Intern

- Built "Carer Connect," a vendor management platform, reducing manual operations by 80% through scalable backend integration
- Developed custom payment gateway integrations (Stripe/Razorpay) and OAuth 2.0 flows, enhancing security and transaction reliability
- Collaborated with a distributed team to deliver responsive web and mobile interfaces, increasing engagement by 35%
- **Stack:** Java, Spring Boot, React, Next.js, PostgreSQL

Education

A.M.C. Engineering College (VTU), Bengaluru

B.E. in Computer Science and Engineering

2020 - 2024

CGPA: 7.96/10

Relevant Coursework: Distributed Systems, Mobile Computing, Data Structures & Algorithms, DBMS, Operating Systems

Project Work

- **FileXP (Native Android):** Feature-rich file explorer built with Android SDK, implementing custom file handling, thumbnail generation, and efficient storage access. github.com/vancityAyush/FileXP
- **String Calculator (TDD):** Robust implementation demonstrating **Test Driven Development** mastery with 100% unit test coverage for complex parsing logic. github.com/vancityAyush/string-calculator
- **Tomorrow Weather (Clean Architecture):** Production-grade weather app template showcasing modular design, dependency injection, and separation of concerns. github.com/vancityAyush/tomorrow_weather

Awards and Certificates

- Google Associate Android Developer (Kotlin) — Google
- AWS Certified Developer – Associate — Amazon Web Services (AWS)
- Meta React Native Professional Certificate — Meta
- OpenJS Node.js Application Developer — OpenJS Foundation
