Summary

Polyglot Software Engineer with 3+ years of experience architecting high-performance mobile applications using React Native, Flutter, and Native technologies (Kotlin/Swift). Specialized in building offline-first architectures, bridging native modules, and optimizing app performance for global user bases. Proven track record of reducing latency by 40% and leading engineering initiatives from system design to CI/CD automation.

Skills

Mobile & Native: React Native, TypeScript, Android (Kotlin), iOS (Swift), Native Modules, Bridge Integration, Gradle, Fastlane, Xcode

Core Engineering: JavaScript (ES6+), State Management (Redux/BLoC), Offline-first Architecture, CI/CD (GitHub Actions), REST/GraphQL APIs, TDD (Jest), Performance Optimization

Work Experience

Creative Synergies Group, Bengaluru

May 2025 - Present

Software Engineer (Full Stack)

- Architected a scalable **mobile application** handling complex workflows for 100+ field engineers, ensuring 99.9% uptime and **offline-first** reliability
- Built high-performance **native modules** in **Kotlin** for document scanning and image processing, integrating seamlessly with the cross-platform UI layer
- Optimized mobile system design by implementing robust state management and caching strategies, reducing data sync times by 40%
- Established automated **CI/CD pipelines** using **GitHub Actions** and **Fastlane**, accelerating build-to-ship cycles for Android and iOS by 50%
- Led **TDD** adoption with **Jest** and mobile testing frameworks, achieving 80%+ code coverage and minimizing regression bugs in production
- **Stack:** Mobile Architecture, Kotlin, Native Modules, TypeScript, PostgreSQL, CI/CD, Offline Storage

HealthFlex, Bangalore

Mar 2024 - May 2025

Founding Engineer (SDE)

- Delivered two end-to-end **React Native** applications using **TypeScript**, achieving a 95% crash-free rate for thousands of global users
- Engineered a high-throughput **native BLE module** (Android/iOS) to stream 20Hz device data, bridging native code with JavaScript for real-time performance
- Optimized app performance by refactoring **state management** and UI rendering logic, reducing TTI (Time to Interactive) from 800ms to 40ms
- Implemented **offline-first storage** and background synchronization, ensuring seamless user experience despite intermittent network connectivity
- Integrated native ML algorithms via custom **Native Modules**, processing 2,000+ datapoints/sec directly on-device without UI blocking
- Managed entire mobile lifecycle including App Store/Play Store deployments via **Fastlane** and **Gradle** automation
- **Stack:** React Native, TypeScript, Native Modules (iOS/Android), BLE, State Management, Performance Optimization

EMotorad, Bangalore

Sep 2023 - Nov 2023

App Developer Intern

- Built a rider companion app featuring complex **native integrations** for Bluetooth connectivity and **Mapbox** navigation
- Developed custom background services and isolates to handle heavy computation and location tracking without compromising UI fluidity
- Implemented **Clean Architecture** and reactive state management patterns, ensuring code scalability and testability
- Reduced map rendering costs by 70% through efficient caching and optimized API usage strategies
- **Stack:** Mobile App Development, Native Integrations, Mapbox, Bluetooth, State Management

Research Fellow

- Developed responsive web interfaces using **React** and **TypeScript**, significantly improving user engagement metrics by 35%
- Integrated third-party payment gateways and OAuth systems, handling secure transactions and user authentication
- Collaborated with cross-functional teams to deliver full-stack features, ensuring alignment with product requirements and design specs
- *Stack:* React, TypeScript, JavaScript, Web Architecture, API Integration

Education

A.M.C. Engineering College (VTU), Bengaluru	2020 - 2024
B.E. in Computer Science and Engineering	CGPA: 7.96/10
Relevant Coursework: Mobile Application Development, Operating Systems, Algorithms, Database Management, UI/UX Design	

Project Work

- **File XP (Native Android):** Built a native file explorer using **Android SDK** (Java/Kotlin) and **Content Providers**; optimized thumbnail rendering with caching strategies to ensure smooth performance on low-end devices. github.com/vancityAyush/FileXP
- **Coddy (VS Code Extension):** Developed a developer tool using **TypeScript** and **Hugging Face API** to provide real-time AI code suggestions; managed complex async state and editor lifecycle events. github.com/vancityAyush/Coddy
- **Tomorrow Weather (Architecture):** Engineered a scalable app demonstrating **Clean Architecture** and **SOLID principles**; separated data, domain, and presentation layers for maximum testability. github.com/vancityAyush/tomorrow_weather

Awards and Certificates

- Meta React Native Professional Certificate — Meta (Coursera)
- Google Associate Android Developer (Kotlin) — Google
- OpenJS Node.js Application Developer (JSNAD) — OpenJS Foundation
- AWS Certified Developer – Associate — Amazon Web Services (AWS)
