SUMMARY

Polyglot Software Engineer with **3+ years** of experience in full-stack mobile development, specializing in Flutter, React Native, Android Development, NodeJs and Java, developed and deployed **10+ production-level apps**.

EXPERIENCE

Founding Engineer (SDE)

Mar 2024 – Present | Bangalore, India

HeathFlex ☑

- Led the design, architecture, and development of a health-focused application from scratch, delivering two highly optimized React Native apps for performance on low-end devices with a **95% crash-free rate**.
- Engineered a **Bluetooth Low Energy (BLE)** module on React Native with multiple device connections using the TDD process with 55+ test cases. The module parsed values at 20Hz per device using **RxJS** streams.
- Implemented a highly efficient modular codebase for Machine Learning algorithms in the React Native environment; enhanced processing capacity by handling over 2,000 data points per second.
- **Optimized state management** of React Native apps to significantly reduce the render time from 800ms to 40ms, improving user experience and app responsiveness, increasing user engagement by 30%
- **Led Android and iOS app release cycles** (with 1000+ users). Implmented **CI/CD** pipelines for efficient release management, automating build, testing, and deployment processes reducing release cycle by 40%.

App Developer Intern

Sep 2023 – Nov 2023 | Bangalore, India

EMotorad ☑

- Engineered scalable E-Bike rider assistant app in **Flutter** with Clean Architecture adhering to **SOLID** principles, integrating **BLoC** for state management, **Retrofit** with **Dio** for REST API integration, **GoRouter** for routing.
- Streamlined Bluetooth communication with E-Bike and 3 accessories, utilizing **isolates** for **multi-threaded** communication and **Background Service** to execute code in background. Applied **Singleton pattern** for resource management, improving connection stability by 90% and reducing latency by 40%.
- Integrated **Mapbox** for in-app journey planning, featuring destination search, routing from current location, and realtime rerouting if the user deviates. Achieved 70% maps cost reduction with efficient map tile caching.

Product Developer

Nov 2021 – Sep 2023

PySphere LLP ☑

- **Accelerated digital transformation** of a vendor management business by developing **Carer Connect**, a cross-platform application, leading to a **80% reduction in manual processes**.
- **Enhanced user engagement by 35%** by developing features like User **Deep Link**, **Push Notifications** and **Google Calendar Sync**.
- **Revamped** PySphere's website ☑ and branding, increasing web traffic by **45%** and improving customer engagement through a **modernized UI/UX design**. Tech Stack: **NextJs, ReactJS Figma & Vercel**.
- Collaborated on developing SonoFlux a multi-tenant website with **custom domains** and **OAuth 2.0**. Also, **Integrated Stripe and Razorpay**, increasing payment success rates by **25%**.

SKILLS

Backend: Spring, SpringBoot, NodeJs, ExpressJS, Apollo, Java, TypeScript, GraphQL, REST API, PostgreSQL, MongoDB, SQL, MQTT, Django, Python, Redis, Kafka, AWS, Google Cloud, AWS CDK, NoSQL, Apache Kafka

Frontend: Flutter, React Native, ReactJS, Expo, AngularJS, Android SDK, iOS, Shift, Dart, Kotlin, JavaScript, TypeScript, Vite, NextJS, Firebase, Figma, Redux, Bloc, Provider, Jest, Zustand, GetX, HTML, CSS, Tailwind CSS

Others:: MVC, MVVM, Clean Architecture, FLUX, SOLID, TDD, DDD, Object Oriented Design, Git, Jira, Sentry, Jenkins, CI/CD, RxJava and Unit Testing

PROJECTS

Coddy ☑

A VS Code extention that give real-time coding suggestion using Hugging Face AI Model. [Published Link](#) ☑

Tomorrow Weather ☑

A Flutter app template, built using clean architecture & SOLID Principles to showcase Low level Design.

PySphere Webface ☑

A website and branding improving customer engagement through a **modernized UI/UX design**.
